INTRODUCTION

The Black Dagger... as its name might suggest, the inn is dark and a shady, seedy atmosphere hangs in the air. The gods look away from this place, so all kinds of crimes can happen without divine justice reaching their perpetrators.

Welcome to Xiphos Games Studio's **TOWNS & VILLAGERS** complement for **FORBIDDEN LANDS**. In this book you will find elements, tables and references to enrich the Adventure Sites creation method and add more aspects and details to the world.

We have decided to create this complement because the original creator for *Forbidden Lands* seemed a bit basic and lacking in certain details that can greatly enrich the gaming experience.

We believe that the most important aspects of an Role Playing Game are its characters. For this reason, we will put special effort in a creator that allows obtaining NPCs that are very diverse in appearance, personality and abilities, making life easier for Gamemasters when it comes to giving life and personality to their campaigns in the *Forbidden Lands*.

In addition to character creation, you can find bonus content for taverns and other important places in a town, as well as many more encounter ideas and adventure seeds.

While there should always be room for improvisation, your villages and towns have never been better defined, at least by random, simple and quick methods.

This is a tool to have on hand whenever adventurers visit a new adventure site. Each character, each location can be a new opportunity to make a game session memorable.

RECOMMENDATIONS WHEN USING THIS RULEBOOK

As with the Scenario creation rules in the Gamemaster's Guide, this book works best with some advance preparation.

It's perfectly possible to roll the dice and improvise how the results affect the game world, but everything will work better and more smoothly if you prepare some villages and towns in advance and get them ready for the game session.

Imagine that the players do not want to wait for you to make all your rolls and fill in the necessary gaps. Use these methods within the session as a last resort when a need arises that you couldn't foresee.

THE TOWN

The group walked the muddy streets with a mixture of curiosity and disappointment. They had been told that Eldham was a beacon of hope and progress in the region, but apparently they had either been misled or the person who told them hadn't seen many towns in his lifetime.

This chapter provides all of the additional items and methods of creating a Forbidden Lands village. By means of these rules you will be able to have its fundamental aspects ready to proceed to specific details of its establishments and characters.

HISTORY

Every good adventure site has a good story, and a town is no exception. Roll on the TOWN HISTORY tables to determine how many events are related to the town. The interpretation of these facts depends on your imagination.

HISTORICAL EVENTS

The age of a town does not mean anything by itself, it simply gives a context of how many years it has been around. What really defines its Attributes are the historical events that have taken place there.

The number of historical events is randomly determined based on the age of the town. Once the first step is done, proceed to roll a D66 on the HISTORICAL EVENTS table as many times as you have been told. Trace the history of the settlement, filling in the gaps with whatever details and nuances make the most sense to you.

All the events should be thought of as events of great

TOWN HISTORY: ANTIQUITY

D66	YEARS	EVENTS	REFERENCES
11-16	D6	1	The Blood Mist has begun to fade.
21-26	6 + D66 x 3	D6 + 1	The Mist of Blood makes it difficult for towns to communicate.
31-36	204 + D66	D6 + 2	The Mist of Blood spreads across the Forbidden Lands.
41-46	270 + D66	D6 + 4	Third and Fourth Alder War, the Demon Flood.
51-56	336 + D66	D6 + 6	Human invasions, Alder Wars, conquest of Harga.
61-66	400 + D66 x 3	D6 + 8	Arrival of the ailanders and aslenes, the Vond Wall.

importance for the history of the town, things that changed their destiny forever. Possibly also an entire region could have been affected, even all of the Forbidden Lands. You could associate an event in the table with events in the Official Story.

Keep in mind that the events do not have to have the settlement as the protagonist, but that events that occur in other places can affect it more or less directly and can also be very important.

Some lines contain words in square brackets. In such cases you should think of something in reference to those

words that makes sense or seems interesting to you.

Ideally, you should get a story told the way you would find it in any Town Adventure Site from the Forbidden Lands books and complements.

Consider that the first historical event is the one that marks the circumstances that gave rise to the settlement and draws a line of events from that point.

TOWN HISTORY: HISTORICAL EVENTS

Roll once and use the entire row or roll twice and combine the results.

D66	SEED OF THE EVENT	CONSEQUENCE OF THE EVENT
11	The alliance between two families ...	... triggered an armed conflict.
12	The feat of a heroine ...	... left an artifact in the village.
13	The finding of an elven ruby ...	... brought together many people.
14	The [faction/armed group] incursion ...	... devastated the surrounding fields.
15	The murder of an important individual ...	... pointed out the need for [structure/s].
16	The appearance of a [kin] ...	... disturbed influential individuals.
21	A clash between families ...	... aroused the interest of merchants.
22	A sorcerer's spell ...	... provoked a nightmarish night.
23	The Blood Mist ...	... ruined the town's economy.
24	The construction of [structure/s] ...	... incited rejection of the [kin].
25	An act of loyalty ...	... inspired the creation of an artistic work.
26	The actions of a criminal group ...	... caused the destruction of [structure/s].
31	The appearance of a [monster] ...	... elevated [group/character].
32	A family tragedy ...	... encouraged immigration.
33	The appearance of a dead [kin] ...	... caused quite a commotion.
34	The appearance of a dead [creature] ...	... aroused great curiosity.
35	A group of adventurers ...	... made [important person] disappear.
36	The brutality of a Rusty Brother ...	... caused many people to emigrate.
41	The rise of a plague ...	... caused the loss of an artifact.
42	The ambition of [kin/character] ...	... diminished the hope of the inhabitants.

TOWN HISTORY: HISTORICAL EVENTS

Roll once and use the entire row or roll twice and combine the results.

D66	SEED OF THE EVENT	CONSEQUENCE OF THE EVENT
43	An internal dispute between factions ...	... cost the town a fortune.
44	A prolonged drought ...	... fueled religious fervor.
45	A bloody battle ...	... provoked the acceptance of the [kin].
46	The duel between two influential individuals ...	... divided the community by his prejudices.
51	A terrible flood ...	... united the entire community for one goal.
52	The bounty on [party/character] ...	... attracted a powerful sorcerer.
53	An act of brutality ...	... revealed the villainy of [character/s]
54	A border dispute ...	... raised the martial spirit of the villagers.
55	A controversial testament ...	... attracted the attention of adventurers.
56	A literary work of quality...	... raised several heroes.
61	A public scandal...	... caused [character/s] to fall.
62	The acts of [religious group]...	... attracted [religious group] to town.
63	A terrible fire...	... caused the death of many people.
64	What happened in a religious ceremony...	... generated great discontent.
65	A political conspiracy...	... marked the character of the inhabitants with fire.
66	An armed uprising...	... forced [important person] to flee.

PRESENT

Once the History of the settlement has been established it is time to focus on its current situation.

The first thing you need to do is determine the **SIZE OF THE TOWN** from the table on the next page. The result will be the main reference in the following dice rolls, but for now don't worry about the **Locations** or the corresponding **Modifier**.

Continue with the **POPULATION DENSITY** table with which you will know how populated the settlement is. You will be able to narrate various aspects of the daily life of the place as well as imagine possible encounters, opportunities and problems that constantly arise. Throw the dice indicated for the **TOWN SIZE** and determine with

approximate accuracy the number of inhabitants of the place. Note that the **TOWN size** is not intended for games around the Ravenland year of 1165, but rather for later stages of the world where towns have been able to progress (perhaps thanks to adventurers!).

TOWN SITUATION

The following rolls define the situation of the town in general aspects. First, determine the problem that afflicts you following the same procedure as with historical events. Continue with its **PECULIARITY** to find out what its most outstanding feature is.

Finally, if you think it necessary, roll dice to find out what **TYPE OF GOVERNMENT** the settlement is governed by.

TOWN SIZE

D66	SIZE	LOCATIONS	MODIFIER
11-26	Outpost	1D3 (1-3)	-2
31-52	Hamlet	1D6 + 3 (4-9)	-1
53-63	Village	2D6 + 8 (10-20)	+0
64-66	Town	3D6 + 20 (23-38)	+1

GENERAL CONDITION OF THE TOWN

D66	CONDITION	MODIFIER
11-14	Ruinous	-2
15-36	Careless	-1
41-56	Maintained	+0
61-64	Pleasant	+1
65-66	Distinguished	+2

TOWN POPULATION DENSITY

D66	DENSITY	OUTPOST	HAMLET	VILLAGE	TOWN
11-14	Deserted	1D3 (1-3)	2D6 + 8 (10-20)	1D66 + 30 (41-96)	3D66 + 200 (233-398)
15-26	Abandoned	1D6 + 3 (4-9)	4D6 + 17 (21-41)	1D66 + 90 (101-156)	3D66 + 270 (303-468)
31-46	Calm	1D6 + 9 (10-15)	5D6 + 37 (42-67)	2D66 + 140 (162-272)	3D66 + 440 (473-638)
51-62	Bustling	1D6 + 15 (16-21)	8D6 + 60 (68-108)	2D66 + 250 (272-382)	4D66 + 600 (644-864)
63-66	Crowded	1D6 + 21 (22-27)	9D6 + 100 (109-154)	3D66 + 350 (383-548)	4D66 + 820 (864-1084)

TOWN PROBLEM

Roll once on the Historical Events table to determine the seed of the event and a second time on this table to get the problem.

D66	PROBLEM	D66	PROBLEM
11-16	It has caused an additional problem.*	41	... has civilians armed and on alert.
21	... causes people to leave.	42	... has disrupted village life.
22	... has the townspeople concerned.	43	... has attracted undesirable [kin].
23	... gives to [character] a lot of power.	44	... fueled cultural or racial tensions.
24	... is ruining the economy.	45	... attracted a hostile army.
25	... left [1d6 structures] in ruins.	46	... has caused [faction] attacks.
26	... has normalized alcoholism.	51	... has the population under stress.
31	... started a wave of disappearances.	52	... aroused the brutality of [group].
32	... made [religious group] stir.	53	... filled the roads with bandits.
33	... has left the streets to criminals.	54	... has the villagers terrified.
34	... has caused [monster(s)] attacks.	55	... has divided the population.
35	... has normalized violence.	56	... made [character] dangerous.
36	... started a witch hunt.	61-66	The town has an additional problem.*

* Roll the dice again. You must then cast again for each additional effect required.

PECULIARITY OF THE TOWN

Roll once to determine the peculiarity of the town.

D66 PECULIARITY

11	Stunning work of art.
12	High quality ironwork.
13	eccentric clothing.
14	Especially beautiful landscapes.
15	immoral custom.
16	fervent religiosity.
21	Absence of children.
22	Educated and highly cultured people.
23	Aberrant religious practice.
24	Very calm atmosphere.
25	Striking proportion of men.
26	Delicious bakery.
31	Very severe penalties against crime.
32	Priceless hidden treasure.
33	Protected by a secret force.
34	Striking hospitality.
35	Site of an important event.
36	Popular and fun game.

D66 PECULIARITY

41	Especially addictive plant.
42	Strange food habit.
43	Excellent alcoholic drink.
44	People of extraordinary bravery.
45	Strong smell of waste.
46	Strange or incomprehensible laws.
51	Lots of kids.
52	Changing and complicated weather.
53	Severe moral censorship.
54	Difficult accent to understand.
55	Striking proportion of women.
56	Striking architectural design.
61	No private property.
62	Inbreeding.
63	Exquisite culinary recipe.
64	Rejection of outsiders.
65	People with no knowledge of the world.
66	The town has an extra peculiarity.

TYPE OF GOVERNMENT

Roll once to determine the town's government type.

D66 GOVERNMENT DESCRIPTION

11-23	Tribal	The chief is chosen by the dominant group, usually warriors.
24-46	Communal	People spontaneously choose a referent who organizes civil life.
51-56	Aristocratic	Those with noble blood elect a leader as dictated by their laws.
61-63	Theocratic	The authority is exercised by a religious leader and supported by his Church.
64-65	Plutocratic	The wealthiest members run the government by making decisions in council.
66	Feudal	The leader's power is sustained by oaths of vassalage and protection.

LOCATIONS

Having established the general situation of the town, the next step is to go into its different locations. To do this, you must roll the dice as many times as indicated in the town size table.

You can do this process while the characters are moving into the settlement and discovering it, but this can take unnecessary time while the players wait for the result, as well as prevent you from planning a good adventure seed.

For each location, roll the dice and determine both its size and its current state in the second table on the next page. This will help your creativity when it comes to narrating the atmosphere and the possible problems or virtues of the establishment, and even of the town itself, depending on what structure it is.

The **QUALITY OF SERVICE** table follows the same line. For locations that do not have people working, you can interpret the result as its qualities from an architectural or urban point of view, or directly its real usefulness due to how it is constituted.

Finally, launch to determine the **PROFITABILITY** of the localization. This can be interpreted as the amount of iron from a mine, the quality and quantity of water from a well, or the profits from a tavern. However, it can also represent the beauty of a square, in the case of locations that do not have direct profitability.

INTERPRET THE ROLLS

With a random location generation method your main job is to make a creative interpretation of the results. In a linear and basic way, not every result will make sense, but with a little effort very interesting combinations can emerge.

If you cannot find a logic to the internal situation of the place, look for it in external factors: if the tavern does not receive enough maintenance, but has good service and is prosperous: Could it be that the money is going away in some way? Could they be extorting the owners? Will they give much of their profits to a cult? Are they financing someone or something? It smells like adventure!

RELIGIOUS GROUPS

Use this table whenever you need a random religious group.

D66	RELIGIOUS GROUP
11-16	Congregation of the Serpent
21-24	Raven Church
25-31	Raven Sisters
32	Reapenters / Blackwings
33-42	Rust Brothers
43-46	Iron Guard
51-61	Cult of Horn
62-64	Cult of Huge
65-66	Order of Maidens

OTHER GROUPS

Roll on this table when you need a random group of people.

D66	GROUP
11-13	Road robbers
14-16	Mafia gang
21-23	Religious fanatics
24-26	Idle mercenaries
31-33	Acting military
34-36	Hungry mob
41-43	Professional guild
44-46	Adventurers
51-52	Demons
53-54	Nobles
55-56	Merchants
61-62	Farmers
63-64	Craftsmen
65-66	Artists

TOWN LOCATIONS

D66	LOCATION	D66	LOCATION	D66	LOCATION
11	Quarry	26-31	Square / Well	51-52	Tower
12	Iron mine	32-33	Inn	53	Bridge
13	Silver mine	34	Smithy	54	Temple
14-15	Warehouse / Barn	35-36	Market	55	Brewery
16	Big house / Mansion	41	Square	56-61	Communal living
21-22	Windmill	42	Barracks	62	Dock
23	Chapel	43-44	Tavern	63-64	Drugstore
24	Tailor shop	45	Barn	65	Castle *
25	Workshop	46	Wall	66	Dungeon *

*If the castles or dungeons are large enough, they can be an interesting Adventure Site within the same town.

LOCATION SIZE AND CONDITION

For Size, add the modifier indicated in the Town Size table. For Condition use the modifier listed in the General Condition table.

D6	SIZE	CONDITION
1	So small that it is uncomfortable or ineffective.	Dilapidated, deplorable or abandoned.
2	Small space, humble, but functional.	It does not receive enough maintenance.
3-4	Standard size for the Forbidden Lands.	It is kept in good repair and presentable.
5	High, spacious or with many rooms.	It is in great condition.
6	Its proportions are strikingly large.	A lot of money has been invested in the place.

QUALITY OF SERVICE / WORKERS

D66	QUALITY / SKILL / PROFESSIONALISM
11-16	Terrible, inept, or uninterested.
21-26	Regular, clumsy or with few qualities.
31-53	Mediocre but standard.
54-63	Of an outstanding and striking value.
64-66	Excellent, expert or impeccable.

The quality of service of a location refers to the sum of skill, will and professionalism of the people who work there, be it the waitress in a tavern or the sentinel in a watchtower.

PROFITABILITY OR PRODUCTIVITY

D66	PROFITABILITY
11-16	Dying
21-26	Scarce
31-53	Acceptable
54-63	Copious
64-66	Amazing

The result can reflect both the profitability of a tavern, the productivity of a mine or the concurrence in a space, such as a square.

To determine the attendance of a place use the Population Density table on page 7.

RAW MATERIALS

In the Forbidden Lands there are a large amount of raw materials waiting to be exploited by its inhabitants. These resources are a great boost to the economy of any town.

However, some sites are more valuable than others, not all raw materials are present everywhere or in the same amount. To determine the presence of these resources there is a table: **AVAILABILITY OF NATURAL RESOURCES**.

Roll a D66 for each column to find out if the resource exists in the settlement hexagon and its abundance.

If in this first roll the result corresponds to the first row, the resource does not exist. This is compelling and self-explanatory for the case of stone, iron, silver, and gold. In the case of wood, the trees are not abundant enough or their species is not suitable for the uses required by civilization. In the case of pastures, the land is not fertile or fertile enough, nor can it ever be due to soil or climate conditions.

RELATED LOCATIONS

Each resource can only be exploited through the right locations and workers. If a resource exists nearby, the town has the corresponding location: crop fields for pasture, a logger's hut for wood, a quarry for stone, or a mine for iron, silver, or gold.

Do not forget to make all the rolls described before for each location.

RESOURCE EXPLOITATION

The natural resources table shows one resource die on each row. That is the abundance of the resource in the town hexagon.

To find out if the resource continues to exist in the same abundance, roll a resource die if it is being exploited. Each roll of 1 reduces the resource die by 1 level. When the resource is on D6 and you roll a 1, the resource is gone.

You must do this every three months if there were locations in operation for at least half of that time, exploiting that resource.

RECOVER RESOURCES

While the trees can be depleted and the land rendered unproductive, it is true that they can recover with time and effort.

This is only possible if the initial roll of the resource did not result in O, that would mean that it is already unrecoverable or that it never existed, for some reason..

So, if the resource of PASTURE or WOOD was exhausted by the exploitation of the Stronghold, it is possible that you return every six months of not using locations that wear them down.

Roll a die: If the result is 5 or 6, return the D6 of the resource die.

AVAILABILITY OF NATURAL RESOURCES

DICE	PASTURE	WOOD	STONE	IRON	SILVER	GOLD
O	11-13	11-16	11-33	11-36	11-46	11-56
D6	14-26	21-36	34-46	41-53	51-56	61-64
D8	31-43	41-53	51-56	54-63	61-64	65-66
D10	44-56	54-62	61-64	64-66	65-66	---
D12	61-66	63-66	65-66	---	---	---

RESOURCE PROLIFERATION

Both PASTURES and WOOD can proliferate given enough time. If you have no resource depleting locations and the resource is already in the hexagon, roll the resource die one level higher than the current one every six months. If the result is the maximum for the die (6 for D6, 8 for D8, etc), then the resource die increases to the next level.

Of course, the different characters in the Forbidden Lands and various events can cause the proliferation of resources to be assured and automatic. Do not let these rules limit the story you want to tell or the consequences of the actions of the adventurers or other individuals.

DISCOVER RESOURCES

What would happen if the hexagon had a juicy deposit of silver but no one had yet discovered it? Starting roll after roll of Exploration would be foolish. It is better for the Gamemaster to figure out how to get the knowledge to the characters.

There may be a legend that talks about it, or a worker stumbles upon the source of the resource by chance (or did he already know?). Work on the most interesting opportunity that comes to mind.

They entered the courtyard of the enclosure in a group in search of the weapons of the master blacksmith. First they heard the constant hammering, the clash of steel against steel. Then, when they were close, they saw the stocky figure of Irvedd. He lifted his head and looked at them nonchalantly as he wiped away the sweat.

Nothing would be a town without its inhabitants, especially those who represent the best and the worst of it, those who lead or support it, who pull the strings of power playing with the pawns to complete their own vision and goals.

In this chapter you will find tools to generate random characters that will populate your settlements and give vitality to your games.

THE DETAILS

The creation tool that we provide you is detailed, but that does not mean that all the characters need to use all the tables and make all the rolls.

You can do the entire process for a few inhabitants, the most important, and then leave others with various pending aspects. Make the rolls when you need some information from them or just invent on the fly according to what you see fit.

FIRST STEPS

The first thing you must do to get to know the character you will create is to determine their most basic data. His life stage, his base Trait points, and his kin. Record these results taking into account the increase granted by

AGE RANGES	
D66	RANGE
11-13	Child
14-33	Young
34-53	Adult
54-63	Old
64-66	Elderly

the Bonus columns. This adds 1 point to the indicated Attribute.

We have decided not to include attributes or peculiarities as they appear in the Gamemaster's Guide since we had nothing to contribute in that regard. You can refer to that book if you want to add something similar.

Keep in mind that thanks to this method, some of the character's Attributes could end up being very high. This is intentional, they are extraordinary individuals and you should highlight them as such. Adding the point for the Profession, the total value could even reach 8 points, two more than the maximum for a PC.

These characters can be understood as individuals of

ATTRIBUTE POINTS

Roll the dice for each Attribute.

D66	DESCRIPTION	VALUE
11-14	Deficient	1
15-26	Average	2
31-53	Remarkable	3
54-63	Outstanding	4
64-66	Amazing	5

KIN AND CULTURAL GROUPS

Roll the dice to determine the NPC's kin. Apply +1 to the Attribute indicated in the Bonus column.

D66	KIN (CULTURAL GROUP)	BONUS
11-16	Alderlander human	Empathy
21-26	Ailander human	Empathy
31-35	Aslen human (quard)	Empathy
36-42	Aslen human (galdan)	Empathy
43	Elf	Agility
44	Frailer	Wits
45	Elvenspring	Wits
46	Dwarf (balderranian)	Strength
51	Dwarf (meromannian)	Strength
52	Dwarf (crombe)	Strength
53	Dwarf (canide)	Strength
54	Orc (urhur)	Strength
55	Orc (roka)	Strength
56	Orc (isir)	Strength
61	Orc (viraga)	Wits
62	Orc (drifter)	Strength
63	Goblin	Agility
64	Halfling	Empathy
65	Wolfkin	Agility
66	Otros (ogre, saurian, whinèrs)	

amazing potential or experience who have worked hard to improve their virtues. Those who are above 6 points in an Attribute are very few in the Forbidden Lands and it should be clear when they appear in the story.

IMPROVE ATTRIBUTES

Although it is not enabled in the official rules, we offer the idea of being able to improve the Character's Attributes through the investment of experience points.

Just as Skills cost 5 times the target value, upgrading an Attribute should cost the target value multiplied by 15.

PROFESSION AND SKILLS

In many cases it will be necessary, or at least interesting, to know the character's greatest qualities, their level of experience in different disciplines and their ability to influence the world.

The PCs might have to deal with the random characters spawned from this tool or need some of its services. In order to generate characters that are as unique or characteristic as possible, it is necessary to have tables that allow obtaining interesting results.

That's what the PROFESSION table is for. Use it when the character's profession isn't obvious from the narrative situation or a specific need for the story.

Each profession has an Attribute column, which indicates a 1 point bonus to that Attribute for the character. This isn't exactly how it works for PCs, but it reflects the advantage of being in that profession for a lifetime.

Also, there are the Skill columns. The so-called 1ST SKILL is the main one for the professional. To know the points of the character in that Skill you must roll the D66 in the PROFESSIONAL EXPERIENCE table. With that value determined, assign the 2ND SKILL by subtracting 1 point from that original result and the 3RD SKILL by subtracting 2 points.

This result also modifies the character's REPUTATION roll on the table below.

Nothing stops you from rolling the dice to get the 2ND and 3RD SKILL if you want more randomness. In such cases subtract only 1 from the result of both.

When you need to know another proficiency of the character that is not in these three columns, you can refer to the NON-PROFESSIONAL EXPERIENCE table that is right next to it.

You may have noticed that with this method characters can have up to 6 points in a Skill. This reflects unbelievable levels of proficiency that are sure to be in the Forbidden Lands in dribs and drabs. As with high Attribute values, take the opportunity to highlight these talented individuals.

MEANS AND OBJECTIVES

Finally, it remains to determine the objectives of the character and how he thinks he should fulfill them, what are his methods to achieve it.

Also, what are the resources available to do so? Are you a wealthy person? Where his money comes from and how he manages it is up to you, but it is a good reference to take into account when interpreting his actions and motivations.

In the Forbidden Lands, sooner or later everyone will need to use their Equipment dice. The character's wealth determines what equipment he can afford. Use the Equipment modifier from the table above and apply it to the Equipment results for both weapons and armor.

Unless you need a very specific description, simply having the number of dice will suffice for the character's participation in combat or other type of circumstance where they must use tools.

PROFESSION

If it doesn't follow from the context, use this table to determine what the character does for a living.

The Skill columns correspond to the character's highest based on her experience.

Apply +1 to the character's Attribute indicated in the Attribute column.

D66	PROFESSION	ATTRIBUTE	1ST SKILL	2ND SKILL	3RD SKILL
11	Beggar	Empathy	Manipulation	Survival	Sleight of Hand
12	Homeless	Agility	Survival	Scouting	Sleight of Hand
13	Farmer	Strength	Lore	Survival	Animal Handling
14	Miller	Strength	Might	Lore	Animal Handling
15	Carpenter	Agility	Crafting	Lore	Sleight of Hand
16	Carver	Agility	Crafting	Endurance	Might
21	Miner	Strength	Endurance	Might	Survival
22	Hunter	Agility	Marksmanship	Survival	Scouting
23	Woodcutter	Strength	Endurance	Might	Melee
24	Fisherman	Agility	Lore	Survival	Scouting
25	Baker	Empathy	Survival	Sleight of Hand	Lore
26	Chef	Empathy	Survival	Lore	Sleight of Hand
31	Waiter	Empathy	Sleight of Hand	Manipulation	Performance
32	Brewer	Wits	Lore	Survival	Manipulation
33	Blacksmith	Strength	Crafting	Might	Endurance
34	Guard	Strength	Endurance	Melee	Marksmanship
35	Soldier	Strength	Melee	Move	Endurance
36	Captain	Strength	Melee	Move	Animal Handling
41	General	Wits	Insight	Melee	Animal Handling
42	Medic	Empathy	Healing	Lore	Manipulation
43	Priest	Wits	Lore	Manipulation	Insight
44	Courier	Agility	Scouting	Animal Handling	Survival
45	Actor	Empathy	Performance	Manipulation	Insight
46	Painter	Empathy	Crafting	Survival	Performance
51	Writer	Wits	Lore	Insight	Survival
52	Minstrel	Empathy	Performance	Manipulation	Survival
53	Butler	Wits	Lore	Sleight of Hand	Insight

PROFESSION

D66	PROFESSION	ATTRIBUTE	1ST SKILL	2ND SKILL	3RD SKILL
54	Builder	Strength	Crafting	Endurance	Might
55	Noble	Empathy	Manipulation	Melee	Insight
56	Druid	Wits	Lore	Healing	Survival
61	Merchant	Empathy	Manipulation	Insight	Lore
62	Bandit	Strength	Melee	Scouting	Stealth
63	Killer	Agility	Stealth	Melee	Manipulation
64	Thief	Agility	Sleight of Hand	Move	Melee
65	Magician	Wits	Lore	Crafting	Insight
66	Tailor	Wits	Sleight of Hand	Lore	Insight

PROFESSIONAL EXPERIENCE

Determine the character's experience. Their points in the **1st Skill** of his profession is equal to that indicated in the Skill column. Subtract 1 point from the one indicated as 2nd Skill and 2 points from the one indicated as 3rd Skill.

D66	EXPERIENCE	SKILL	REPUTATION
11-26	Inexperienced	1	+0
31-43	Competent	2	+1
44-53	Expert	3	+2
54-61	Master	4	+3
62-64	Grand Master	5	+4
65-66	Legend	6	+5

NON-PROFESSIONAL EXPERIENCE

This table is used to determine the points in other Skills than those listed in the profession.

D66	EXPERIENCE	SKILL
11-26	Ignorant	0
31-42	Inexperienced	1
43-52	Competent	2
53-56	Expert	3
61-63	Master	4
64-65	Grand Master	5
66	Legend	6

REPUTATION

Roll a die and add the bonus from the previous table. Write what is indicated in the Reputation column.

D6+	DESCRIPTION	REPUTATION	D6+	DESCRIPTION	REPUTATION
1-2	Anonymous	0	7	Highly recognized	5
3	Unknown	1	8	Prestigious	6
4	Barely known	2	9	Famous	7
5	Known	3	10	Eminence	8
6	Recognized	4	11	Legend	9

CHARACTER OBJECTIVE

Roll once and use the entire row or roll twice and combine the results.

D66	OBJECTIVE OR VISION	METHOD TO ACHIEVE IT
11-12	To increase their personal power ...	... will make the intrigues that are necessary.
13-14	For their community to prosper ...	... will promote an infrastructure project.
15-16	For [religious group] to grow ...	... will destroy the heretics.
21-22	To accumulate riches ...	... will eliminate any competition.
23-24	For [kin] to have greater influence ...	... will generate an armed conflict.
25-26	For people to live better ...	... will try to have social peace.
31-32	To ingratiate themselves with their superior ...	... will humiliate their rivals.
33-34	To honor their oaths ...	... will behave honorably.
35-36	To dispense their justice ...	... will destroy the current order.
41-42	To achieve personal glory ...	... will gather an army.
43-44	To glorify their deity ...	... will burn the world if necessary.
45-46	To destroy their rival ...	... will invest all the money they can.
51-52	To start a conflict ...	... will generate mistrust among people.
53-54	To achieve their revenge ...	... will do everything in their power.
55-56	To impose their vision of the world ...	... people are replaceable pawns.
61-62	To help a loved one ...	... will recklessly endanger themselves.
63-64	To eliminate an evil ...	... will appeal to the entire community.
65-66	To repair a misfortune ...	... will bring together the best individuals.

WEALTH OR PROFESSIONAL SUCCESS

The result will tell you the economic situation of the NPC.

D66	WEALTH	GEAR
11-16	Too much debt.	-2
21-26	In debt.	-1
31-53	Living with the minimum.	0
54-63	Several luxuries.	+1
64-66	Life solved.	+2

There may be a substantial difference between the character's individual wealth and the prosperity of his business, for example. This is nothing more than an opportunity to develop a story.

The Gear column determines the modifier for the Gear roll shown below.

GEAR

When applicable, roll dice twice to determine weapon and armor dice.

D6	WEAPONS / ARMOR	DICE
0	No weapons / No protection	0 / 0
1	Light Weapon / Helmet	+1 / 1
2	Light Weapons / Leather	+1 / 2
3	Light Weapons / Studded Leather	+1 / 3
4	Professionals / +Helmet	+2 / 4
5	Professionals / +Headpiece	+2 / 6
6	Professionals / Plates	+2 / 8
7	Professionals / Plates	+2 / 10

SITUATIONS

Eldrin walked leisurely down the main street of Aramore, looking at the small stalls offering everything from fruit to iron tools, even well-worked steel weapons. Suddenly, the distant sound of desperate screams reached his very fine ears: a fire was getting out of control.

The so-called SITUATIONS are the seed of adventures, and there is no more propitious breeding ground for problems than a town. We encourage you to come up with as many as you feel is consistent with the size of the settlement and fits with the players' desire to stay in place solving problems and enriching the story.

Some of these situations will be public knowledge and others will remain latent, so it is entirely possible that several of them will be revealed by chance or after investigations by the adventurers.

That said, we present this method of generating situations so that you can do it as you need it, improvising in the middle of a game. You never know when you'll need to have a problem ready, so we hope you'll find this help helpful.

For example: *An important sacred place revives old desires for revenge.* It does not seem to be a consistent result for the reality of the Forbidden Lands. But while you can just repeat the roll, it's better to get the most out of the phrase. That some travelers find an ancient place of worship to the god Wyrn could cause some rusty brothers to decide to break the social peace and start a witch hunt against heretics.

If a rumor seems like a latent problem and you need a current one, change the phrase to something that is more convenient for you.

There is a possibility that in some cases you may need to use more creativity to interpret a result. *An ancient unsolved mystery must be avoided* doesn't seem logical, but the phrase can be understood and reinterpreted as meaning that the mystery must be prevented from being publicly known.

SITUATION SEEDS

The first thing you should do is roll the dice once and look at the result in the SITUATION SEED table to determine the cause of the situation and complement the sentence with a new roll to find out its RELEVANCE.

In general, you won't have any trouble coming up with a suitable phrase, but there may be cases where it's not an obvious problem. That shouldn't be a real drawback if you use some creativity.

EVENT GENERATOR

Although the situation is the first step to obtain an adventure, it is true that the resolution of them depends largely on the initiative of the player characters, so you must improvise the consequences of their actions in the process of achieving it. However, if the entire universe revolved around what they do, sooner or later it would feel lifeless.

SITUATION SEEDS

Roll once and use the entire row or roll twice and combine the results.

D66	CAUSE OF THE SITUATION	RELEVANCE OF THE SITUATION
11	A group of adventurers ...	... is taking over the town.
12	The appearance of a monster ...	... ruins a bartender's business.
13	An artifact of great value ...	... is causing people to die.
14	A local agitator ...	... has the villagers terrified.
15	A conflict between nobles ...	... can cause great destruction.
16	Members of [religious group] ...	... should be investigated.
21	A committed political group ...	... has stirred up old rivalries.
22	The arrival of a powerful individual ...	... generates nervousness among the leaders.
23	The rumor of enemies gathering ...	... revives old desires for revenge.
24	A horde of demons ...	... has started a witch hunt.
25	Some traveling artists ...	... they need help.
26	A mighty arcane book ...	... should be destroyed.
31	A mafia gang ...	...is causing trouble for a craftsman.
32	A serious crime against a noble ...	... is generating social disorders.
33	A serious crime against a merchant ...	... must be prevented.
34	A serious crime against a villager ...	... causes food shortages.
35	A serious crime against a [kin] ...	... has traders very nervous.
36	A strange disease ...	... has caused a religious problem.
41	An important individual who left the village ...	... has awakened a dangerous creature.
42	A sacred place of importance ...	... is causing an immigration spike.
43	The rumor of a possible invasion ...	... is killing the trade.
44	A wealthy foreign merchant ...	... coincides with the disappearance of an artifact.
45	A serious suspicion about a [kin] ...	... can cause the overthrow of the leader.
46	The scarcity of a resource ...	... has made thieves organize.
51	An ancient unsolved mystery ...	... has unleashed the madness of a villager.
52	The planned execution of a villager ...	... is causing tavern melees.
53	The siege of a town ...	... has awakened a dangerous creature.
54	A battle about to break out ...	... is causing an exodus.
55	A local who did a stupid thing ...	... has awakened a dangerous creature.

SITUATION SEEDS

Roll once and use the entire row or roll twice and combine the results.

D66	CAUSE OF THE SITUATION	RELEVANCE OF THE SITUATION
56	A dire precognitive dream ...	... has the town's tension rising.
61	An offensive message painted with blood ...	... has spread fear among the villagers.
62	A group of lawless warriors ...	... is adding supporters to a cause.
63	A religious text found ...	... attracts the attention of [religious group].
64	A wonderful precognitive dream ...	... has started a series of murders.
65	Excavations in a mine ...	... arouse the interest of [group/faction].
66	The brutality of an individual ...	... is destroying the morale of the people.

Of course, giving the world a life of its own is a fantasy, a mirage (clearly everything is focused on the PCs), but a fantasy that as Gamemaster is good to produce. You never know the interesting outcomes that can result from an unexpected event.

For that reason, here is a method for generating random events.

STEP ONE: DETERMINE ELEMENTS

Roll a D66 four times, checking the results in the ELEMENTS table. This will give you a series of pieces to take to make up the event. From now on we will take as an example the results 1, 6, 2 and 3.

STEP TWO: GET THE SEEDS

Using the CIRCUMSTANCE table, the RELIGIOUS GROUPS, OTHER GROUPS and PROFESSION tables from the previous chapters, the MONSTER table from the Gamemaster's Guide, and the ACTION table, roll the corresponding dice to randomly obtain the EVENT SEEDS.

Taking example 1 (CIRCUMSTANCE), 6 (ACTION), 2 (CIRCUMSTANCE) and 3 (PROFESSION) we could obtain the following results: Public Duel, Quit, Murder and Brewer.

ELEMENTS

Throw a D66 four times to get the event elements.

D66	ELEMENT
11-26	Circumstance
31-33	Religious group
34-36	Other groups
41-46	Profession
51-53	Monster
54-66	Action

STEP THREE: INTERPRET THE EVENT

Finally, what you have to do is interpret the event based on the seeds obtained. You will need to use all your creativity and imagination, since it is not easy to link concepts that are often so different and unconnected, but unexpected and interesting events can arise.

Given the four example seeds, you could interpret Willem the Brewer abandoning his duel to the death to commit murder.

It could also be something like: Willem the Brewer

was killed for walking out of his scheduled fight at an underground fight club.

You can present this situation to the PCs when they are attending one of these shows, only to learn that they have to go find the brewer in question because he hasn't shown up for his match. It is also possible that they themselves see Willem running, either on his way to commit the murder or running from his killers.

As you can see, all kinds of events can arise with this method. Although it takes a lot of work on your part to make it work, seeds can result in a huge number of variables.

Just as you don't have to follow the order in which the seeds appear to interpret the event, you don't have to take

those seeds literally either. Public dueling can be any one-on-one combat whether it be on the street, in a tavern, or in the corridors of a catacomb. Leaving as an action can be interpreted in any way that inspires you the most, change the word if necessary: give up, neglect, leave... even if it already appears in the table.

Always remember that events, unlike situations, often present themselves to the PCs without them looking for them. It is something that comes their way. If they prefer to ignore it, you can force them to track it down through an authority, save it for later with bigger repercussions (they could have prevented it from getting any worse!), or simply dismiss it.

CIRCUMSTANCES

Roll once to get a circumstance for the event.

D66 CIRCUMSTANCE

11	Coordinated attack.
12	Fight in the streets.
13	Protest.
14	Artistic representation.
15	Gathering of sorcerers.
16	Procession in the streets.
21	Inauguration of a new structure.
22	Public execution.
23	summer fair.
24	A spell goes wrong.
25	Beer Fest.
26	Army returning.
31	A marriage is celebrated.
32	A building about to collapse.
33	Heated discussion.
34	Fire!
35	Monster/s on the move.
36	A political intrigue has just broken out.

D66 CIRCUMSTANCE

41	Army passing through the town.
42	A thief is on the loose.
43	official announcement.
44	Application of martial law.
45	Earthquake!
46	Storyteller narrating a story.
51	Public duel.
52	Military recruitment.
53	Camp battle.
54	A criminal has escaped.
55	The animals behave strangely.
56	Flood!
61	Enemies approaching.
62	Murder.
63	Revolt!
64	Appearance of an artifact.
65	A group of female adventurers appears.
66	Refugees arriving.

ACTIONS

Roll once to get an action for the event.

D666	ACTION	D666	ACTION	D666	ACTION	D666	ACTION
111	ambush	154	blow	242	eat	326	bet
112	point	155	despair	243	babble	331	deal

454	annihilate	542	enchant	626	alter		

VICISSITUDES

Walking through the streets of Runswick, Iradros was astonished. The place had made incredible progress in the past few months. It seemed like the little help he gave to the local government had promoted the progress of the town, and it was reflected not only in its business, but in the faces of its people.

Having resolved all the bases of the settlement, both its past and its present, it is time to focus on its future. The so-called VICISSITUDES are the possible events that can happen to an Adventure Site throughout its existence and that will alter its general state as well as the quality of life of its inhabitants, offering the adventurers a palpable change of situation and altering their interaction with it.

VICISSITUDE ROLL

VICISSITUDE rolls are made once a month for each settlement whose general progress you are interested in keeping track of, probably because it is a place that adventurers visit recurrently.

The first step to make the roll is to count its possible VARIABLES. Review the situation of the settlement and add the corresponding modifiers. The one that is out of the ordinary is the first, which indicates a +X modifier, this corresponds to the modifier that appears in the GENERAL CONDITION OF THE TOWN table on page 7.

The VARIABLES will give you a number as a result that you must apply in the subsequent roll on the table of VICISSITUDES: it consists of rolling 3D6 plus the pertinent modifier in order to obtain the consequences of the month.

There are several effects to take into account in the

table of VICISSITUDES that we will clarify below so as not to leave room for confusion.

GENERATE A PROBLEM

When you get a bad result on the vicissitudes table, you may be prompted to create a problem for the settlement.

You must go to page 7 and roll the dice as indicated in the TOWN PROBLEM table. This problem is added to any problems already in effect in the settlement.

Keep in mind that the more problems the town accumulates, the worse modifiers it accumulates for its next VICISSITUDES roll.

TURN SITUATION INTO PROBLEM

Another possible bad outcome will tell you to turn a situation (page 18) into a problem. This only applies if the town has an ongoing conflict situation that the adventurers haven't resolved. Although you can also roll on the table to generate one if you see fit.

The situation escalates in magnitude or importance and becomes a real problem for the stability and survival of the settlement.

VARIABLES

Each month, look at the following table and add the modifiers that apply.

VARIABLE	MODIFIER
General condition of the town (page 7).	+X
Population density is <i>deserted</i> or <i>abandoned</i> .	-1
Population density is <i>bustling</i> or <i>crowded</i> .	+1
For each unresolved problem the town has (page 7).	-1
For every problem that has been solved in the town, be it by the adventurers or another cause.	+1
For every agitator or political group that is challenging the leader's authority.	-1
The authority of the ruling political group or leader is not being challenged.	+1

VICISSITUDES

Roll 3D6 once and add the modifiers from the table above to get the vicissitude of the month.

3D6	VICISSITUDE	CONSEQUENCE
<3	Anarchic situation	Generate 1 problem (page 7). The population is reduced by 20D6 inhabitants. Worsen 1D6+3 locations.
3	Catastrophe	Generate 1 problem. The population is reduced by 10D6 inhabitants. Worsen 1D6 locations. Reduce the general condition of the town by 1.
4-5	Crisis	Turn 1 situation (page 18) into a problem. The population is reduced by 5D6 inhabitants. Worsens 1D3 locations.
6-7	Bad management	Turn 1 situation into a problem. Reduce the general condition of the town by 1 level.
8-9	Restlessness	The population is reduced by 2D6 inhabitants. Worsen 1 location. Modify the next vicissitudes roll by -1.
10-11	Quiet period	There are no apparent changes.
12-13	Little boost	The population increases by 2D6 inhabitants. Improve 1 location. Modify the next vicissitudes roll by +1.
14-15	Progress	Generate 1 new location. The population increases by 5D6 inhabitants. Improve 1D3 locations.
16-17	Good management	Improve 1D6 locations. Increase the general condition of the town by 1 level.
18	Prosperity	Generate 1D3 new locations. The population increases by 10D6 inhabitants. Improve 1D6 locations.
>18	Splendor	Generates 1D3+3 new locations. The population increases by 20D6 inhabitants. Improve 1D6+3 locations.

Keep in mind that if any of the indicators, be it size, condition or profitability, are reduced after having the lowest level, they are no longer operational, due to collapse, abandonment or bankruptcy.

Upon getting a good result on the vicissitudes table, you may be prompted to generate one or more settlement locations.

Then refer to the TOWN SIZE table on page 7 in the LOCATIONS column: if the new number of locations indicates that the size category has changed, mark it on the settlement sheet.

MODIFY POPULATION

Then consult the town POPULATION DENSITY table on page 7 in the corresponding column: if the amount of population indicates that the density category has changed, indicate it in the settlement sheet.

When the result tells you to IMPROVE or WORSEN locations, you should go to two tables on page IO: LOCATION SIZE AND CONDITION and PROFITABILITY OR PRODUCTIVITY.

GENERAL CONDITION OF THE TOWN

A town can never improve its level above distinguished
nor worsen below ruinous.

Although the condition of the town corresponds to its general appearance and what is perceived when walking through it, it does not change the particular condition of its locations at all. Even so, the good and bad actions of the rulers of the town will modify future `VICISSITUDE` rolls, as indicated by the first row of the `VARIABLES` table.
